

Win More Business

Designed and developed by industry experts for Manufacturer's Representatives firms; Rep Edge is a **front-end sales and warehouse management platform** that integrates with Microsoft® Dynamics GP accounting software to capture typical workflows and increase efficiency.

Save Time

Rep Edge enables you to standardize your business processes and store everything in one place for convenient access by managers, reps, and their assistants.

- > Track sales opportunities and bids in a calendar view by day, week, or month
- > Access your customer and business contacts in a centralized location
- > Import supplier quotes and orders
- > Browse inventory in real time with instant access to warehouse pricing
- > Send quotes to bidders in one click
- > Convert bids to sales in a single step – no data re-entry required

Sell More

Use Rep Edge to be a stronger competitor in the market, capitalize on more sales opportunities, and analyze sales trends.

- > Focus on sales – the accounting system integration relieves reps of administrative tasks
- > Know which contractors are bidding on jobs
- > Deliver more accurate, competitive quotes
- > Follow-up with customers more efficiently
- > Create a consistent customer experience
- > Access historical sales data and generate management reports

Make Billing Easier

Rep Edge integrates with Microsoft's Dynamics GP accounting package to make billing faster, easier, and more accurate.

- > Automate the billing process
- > Eliminate redundant data entry
- > Easily match vendor invoices and projects

Rep Edge software includes **integrated modules** for the effective management of the end-to-end sales process.

Collaborator

- > Organize and access your contacts in a centralized database

Quote

- > Track prospective business on the Bid Board
- > Generate quotes
- > Promote bids to sales

Project

- > Manage projects
- > Schedule releases
- > Bill customers
- > Track vendor costs
- > Apply commissions

Warehouse

- > View and manage inventory
- > Set pricing levels
- > Sell directly from the warehouse

Admin and Reporting Tools

Managers can configure the software to better reflect the business needs of the office, define employee permissions, and generate sales and management reports.

Training & Support

Transitioning your office to Rep Edge software is easy. The product is fully supported by a comprehensive user reference manual, training videos, live WebEx training delivered by a product expert, and technical support services.

System Requirements

Rep Edge is a Windows-based client-server application. The Rep Edge data and Web services are stored on a server that is accessed by a client application.
