

REP EDGE 4.5 RELEASE NOTES

New Features

Description	
<p>Ability to track more shipping information on a release. This is the foundation for future integration with order status services like RepNet</p>	
<p>Add the project/quote name to the network drive folder name for easier access to files that are linked to a project or quote</p>	
<p>Add an admin screen that will allow an office to set up default sub folders automatically when a quote or project is started</p>	

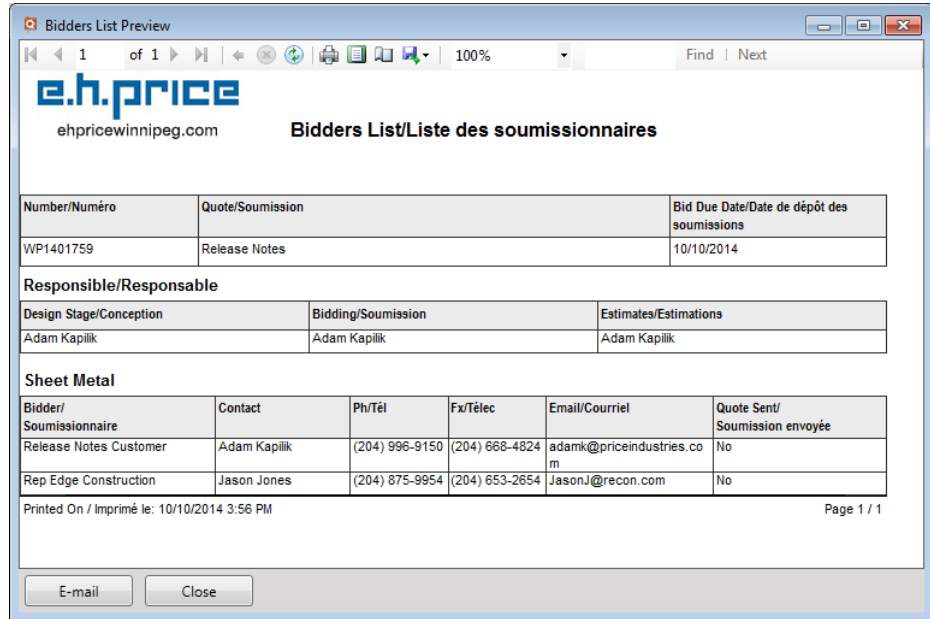

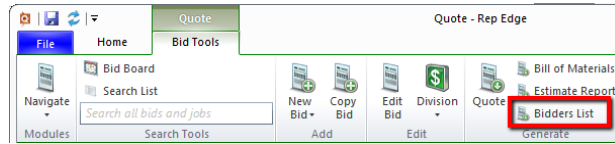

Improve performance when opening releases in a project

Releases now load 85% faster

Enhance Inventory lookup on the warehouse order screen

Add the ability to copy Quote, Order, Project and Release numbers to the windows clipboard so that they can be easily used as reference in other applications

Add the ability to print the bidders list for a quote

Add customer name to the reallocate dialog
